SUMMARY

With a robust foundation in full-stack development, I bring extensive expertise in the MERN (MongoDB, Express.js, React.js, Node.js) stack, along with proficiency in PHP, Django, HTML, and CSS. My journey spans over 1.5 years of self-driven exploration and hands-on experience acquired during two internships—one as a full-stack developer and another as a backend developer. I excel in crafting dynamic and responsive web applications, leveraging cutting-edge technologies to deliver seamless user experiences. Passionate about continuous learning and innovation, I am poised to contribute my diverse skill set to dynamic projects that push the boundaries of web development.

EXPERIENCE

Backend Developer

CCBUL LLP

08/2023 - 10/2023 Remote

- As a backend PHP developer during my internship, I played a pivotal role in API integration, crafting robust features, and implementing essential security measures. My responsibilities extended to seamlessly connecting diverse systems through API integrations, enhancing overall functionality.
- I demonstrated proficiency in building impactful features, contributing significantly to the project's advancement. My focus on security measures ensured the integrity of the system, safeguarding against potential threats.
- This hands-on experience not only honed my PHP skills but also deepened my understanding of backend development, fostering a keen appreciation for the critical aspects of API integration, feature building, and robust security practices

Full Stack Developer

Supercluster Productions

12/2022 - 03/2023 Andheri , Mumbai

- As a full-stack developer in my internship, I immersed myself in the entire development lifecycle, mastering design principles, crafting industry-optimized code, and overseeing seamless deployment processes.
- This experience enriched my skills in creating aesthetically pleasing and user-centric designs while ensuring the efficiency and reliability of deployed applications.
- I developed a holistic understanding of the development pipeline, honing my ability to deliver end-to-end solutions aligned with industry standards.

EDUCATION

Bachelor of Engineering : Computer Science

Terna College of Engineering

2021 - Present

GPA

7.86 / 10.0

TECH STACK

Programming Languages / Tools

Python

Java

C

C++

POSITION OF RESPONSIBILITY

Technical Lead

Google Developer Students Club (Terna)

📅 10/2023 - Present

Led a talented team, managing all technical aspects of our club's website and events. Oversaw everything from hardware to software, ensuring seamless operation and technical excellence.

Web Developer Lead

Entrepreneurship Cell (Terna)

📅 09/2023 - Present

I orchestrated and led a dynamic group, channeling collective skills to achieve exceptional results. In this role, I garnered invaluable experience in team management, drawing out the best from each member. This hands-on leadership exposed me to the intricacies of product planning and various project-building methodologies, fostering a comprehensive understanding of effective collaboration and project execution within a team environment.

Technical Executive Lead

Computer Society of India

📅 11/2023 - Present

As the Technical Lead, I led with a passion for technology and a commitment to team growth. Navigating challenges, fostering innovation, and achieving technical excellence defined my leadership journey.

STRENGTHS

Solving complex problems

Analytical thinker, adept at solving complex problems with innovative solutions.

Collaborative Worker

Proactively collaborates, contributing to team synergy and collective success.

EVENTS

Walmart Sparkathon

Participated in Hackathon arranged by Walmart submitted the prototype and idea along with the full solution.

AI Amplify Hackathon

Created three working ml models with my talented team gained some real world ML practices .

Devfolio Hackathon

Participated in my first ever hackathon made connections got to know working under pressure and with time constraints.
